Also in the game Tekken, some humans are said to have the "Devil **gene**" where they transform into Devils, just as we have the **genetic material** of Divs.

Jinn Kazama

Kazuya Mishima

So how did this all start? Why do we even transform into Divs?

It all goes back to Audam in the garden and the tree that they were forbidden from.

"Then Satan (Shaytaun) tempted them, to expose to them **what was hidden from them of their nakedness**, and he said, 'Your Lord has only forbidden you from this **tree** lest you should become angels (Malakayn), or lest you become immortal.' " 7:20

Tabaree narrates that their private parts were hidden from them.

"So when they **tasted of the tree**, their nakedness became **exposed** to them" 7:22

In other words it was the tree that paved the way for their private parts to grow. And it is the private areas that carry the genetic material of both humans and Divs.

And who offered the tree and tempted them into eating from it? Shaytaun. And who is the Shaytaun? Eblees? 7:18 says he was **banished** prior to the incident of the tree. So how could it be him? Unless we say he did it with someone's help

I believe that it's a Shaytaun known by Jews as **Lilith** who is associated with **temptation** and respected by feminists.

In the Talmud and early Jewish literature

In some passages of the Babylonian Talmud and related writings, Lilith appears as:

- a night demon,
- a dangerous female spirit,
- associated with sexuality, childbirth dangers, and infants.

These references are brief and fragmented.

But beginning especially in the 19th and 20th centuries, some writers and feminist thinkers reinterpreted the medieval story of Lilith refusing to submit to Adam as a symbol of:

- female self-determination,
- sexual autonomy,
- rebellion against patriarchy,
- refusal of unequal relationships.

Lilith actually appears as the villain and a devil in the game Diablo 4:

She even refers to humans in the game as **"her children!"**
But in the addition story, "Diablo 4, Lord of Hatred", she returns only to die as a **hero**!
She sacrifices her life to save humans ("the children"). So this Kabbalist game completely twists the story.

Another Kabbalist movie:

The movie is about androids (robots) but the plot is about a suspicion that androids were capable of **reproducing biologically**. The Main character is called "K" and in the beginning of the movie we see him stand by a **tree** which the movie tries to make a lot of focus on

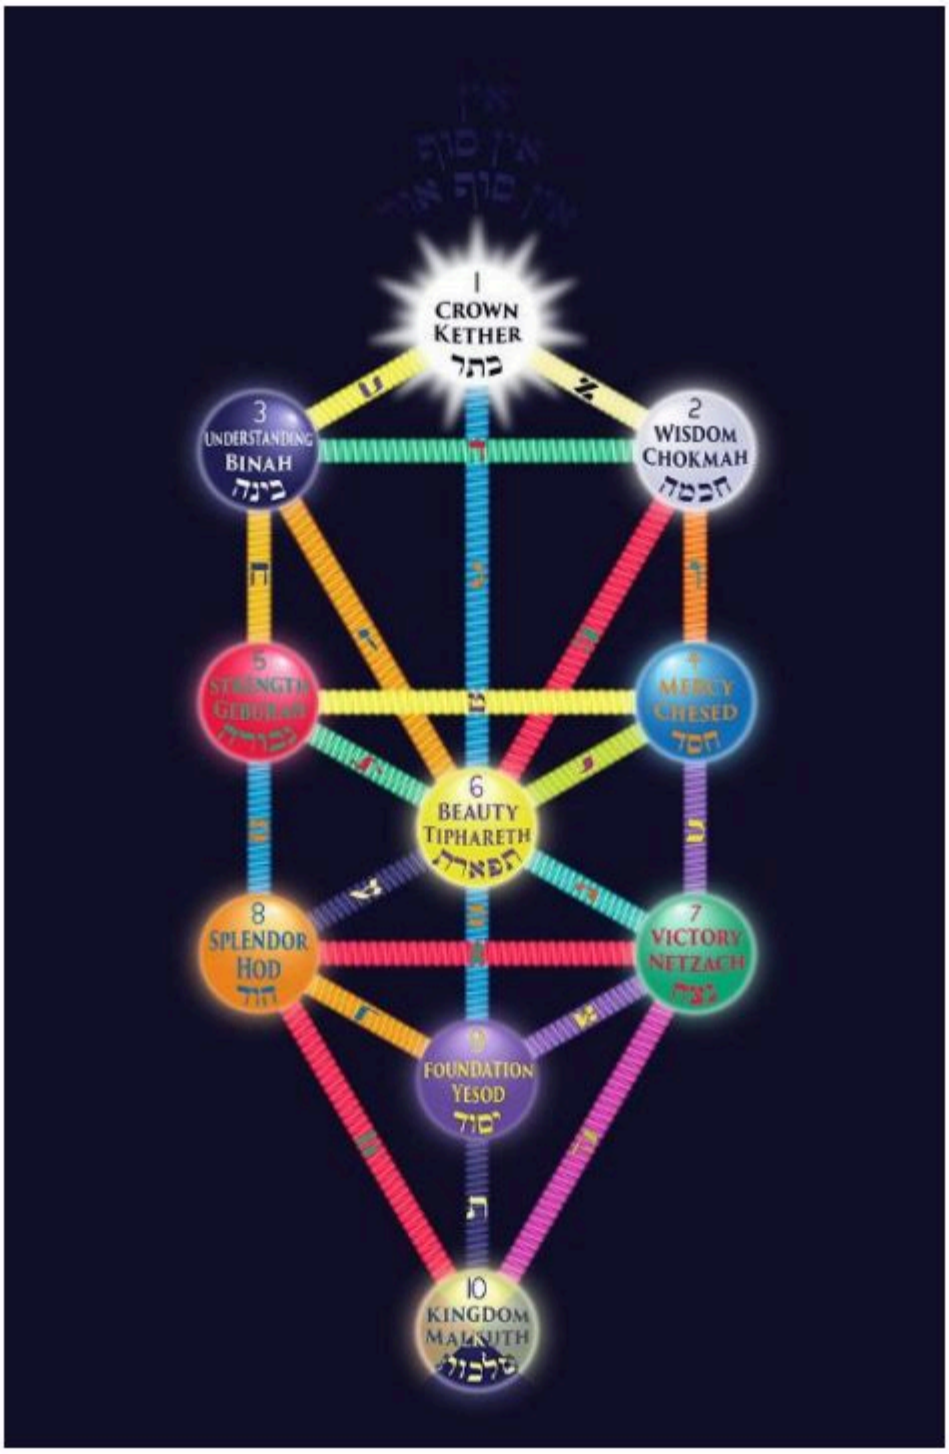
In the movie, they find a box under the tree with the remains of an **android** that gave **birth** even though it was thought impossible. Later in the movie, K the protagonist

realises that HE was the android that was given birth to.

But notice how they associate **forbidden (impossible) procreation** with the **tree** just like how Audam ate from the tree, had his private parts grown and started the progeny with the devil **gene**.

In other words, could the tree have been specifically designed to alter DNA? Was It Shaytaun who created it? Or could Shaytaun have simply led them to it? Also whose DNA was it? We know it's of Divs, but is Lilith a Div? She definitely looks like one in Diablo 4. That could be why she refers to the people as her children.

Kabbalist tree



Crown = Head

Strength = Arm

Foundation = Private part, transfer of genetic material
Kingdom = What is firm on the ground, Foot

It's symbolic of a person. And that's what happened with Audam when they ate from the tree. They became different people. It changed their biology and corrupted the biology of all descendants.

"We said, 'O Adam, dwell with your mate in paradise, and eat thereof freely whencesoever you wish; but do not approach this tree, **lest you should be among the wrongdoers**.'" 2:35

And yes not only did it give us an evil nature, but it really is true, the tree can make people oppressors and Kabbalists are the worst of them, which is why they target children, animals and all who are weak. E.g. Yahoodi man who killed a child during the early days of Eslaum.

Look at Michael (symbolic of the favourite Kabbalist Angel Michael) Jacksons brutal childhood with his oppressive dad. The Gor'aun tells us that the **greatest** enemy to the people of light are the Yahood/Kabbalists

The Shayauteen write words, and symbols in the form of anthropomorphic beings. The fake "Allah" is written in the form of a snake and the "w" which is related to hinduism. And the Kabbalist tree also resembles a person

Now I will talk about the effect of worship and how it can change a person's personality completely, and how it's related to the Kabbalist tree worshippers

Behind every object of worship is a Shaytaun. When you pray **to** anything **for** an evil thing, (not good) like to fulfill your biological desires, to fornicate with a girl, to become rich and famous and be deluded by the deceptions of this world, your supplication is **forbidden** from going to Allauh and is misguided. It is then that your supplication is picked up by an evil being in the astral world whom gains control and supremacy over you.

Even people who claim to worship "Allah" or even "God" but have the wrong intention in prayer, these people end up being subdued by evil astral beings who simply call themselves "Allah" or "God".

This is why Saudi Salafi laymen are Paranoid! (Literally), and they live in constant fear over making slight mistakes. That's because they're worshipping "Allah" who is a giant tyrant that forces people to submit and we must just obey without asking questions, and if we do then we get thrown into the eternal fire.

Div-Looking Saudi Salafi "Scholar"

So do you see the connection between the behaviour of these Saudi Salafis and what they worship? **Fear due to tyranny**. Likewise the Kabbalists are most evil and will even follow the worst being (the fake 12th imam) and rightfully so. But they are this way due to the worship of the tree and the Shaytaun (Lilith) who is subduing them.

Lilith became associated with babies through a mix of ancient Mesopotamian demon traditions, Jewish folklore, and medieval superstition.

Here's the short version of how the connection developed:

- In ancient Mesopotamian traditions, there were female night spirits or demons linked to illness, miscarriage, infant death, and danger during childbirth. Some names related to "Lilith" appear in these traditions thousands of years ago.
- In later Jewish folklore, Lilith evolved into a figure described as dangerous to newborns and pregnant women.
- Medieval texts and amulets claimed she stole or harmed infants, especially male babies before circumcision and girls in early infancy.
